
Walnuts

Heartnut - 40' T x40'W

Butternut - 30'T x 30'W

Buartnut - 40'T x 40'W

Features:

- Food - nuts (lots of nuts)
- Heartnut & Buartnut resists canker; Butternut is very susceptible to the fungus disease *Sirococcus claviginenti-juglandacearum*, that causes cankers.
- Juglone - this chemical is produced by walnuts in the soil and inhibits growth of many other plants; plants that are tolerant include a long list like elderberry, paw paw, rhubarb, hazelnut, plum, black locust, currant, russian olive... many more are found on the internet.

Characteristics:

Size	40'T x x40'W	Sun/Shade	full sun
Soil	sandy clay loam ph 6-7	Pollination	needs cross pollinator
Zone	6-8	Water	moist
Bloom	May	Harvest	Sept
Decid. /Evrgreen	deciduous
